

MOXIMIC T

Flavored parasiticide for horses

Formula:

Each 100 g contains:

Moxidectin.....2.0 g

Praziquantel.....12.5 g

Excipients q.s.ad.

Indications:

Moximic T is a safe and effective parasiticide for horses, which acts on mature and immature forms of parasites. It removes large and small strongylus, ascarids, pinworms, pulmonary parasites, gasterophilus and tapeworms

Effective on inhibited and cystic states of cyathostomes and when diagnosed parasite resistance to benzimidazoles.

Target species:

Equines.

Withdrawal period:

Do not use in animals younger than four months. Product for horses not intended for human consumption.

Route of administration:

Oral route with a dosing syringe. It is recommended precision when calculating the weight of the equine to be dosed.

Dosage:

Slide the ring marker to the horse weight mark. Remove the cap and insert the tip of the syringe into the horse mouth in order to administer the product in the back of the mouth.

The dosing syringe is graduated every 100 kg of animal weight. Recommended dosage:

0.4 mg of Moxidectin and 2.5 mg of Praziquantel per kg of weight.

It reduces faecal parasite eggs count for more than 12 weeks.

It can be administered to pregnant mares, breeding and training horses.
