

AMINOSULES ULTRA FORTE

Nutritional supplement Vitamins, amino acids, minerals, macro and oligoelements

Indications

Easy assimilation, supplement and feed additive. Its components -vitamins, amino acids, minerals, macro and oligoelements- provide daily indispensable elements for the

best performance. Thus, Aminosules Ultra Forte guarantees excellent development and production of animals, as well as a better performance in athletes.

It is indicated for exhibition and competition trainings, and as a strengthener of the muscular development of animals in sport and competition. And also as feed additives in critical phases as: gestation, lactation, growing, development, joint alterations, fur alterations, coprophagy cases, bad absorption, nutritional deficiencies, etc.
