

MUCOMIC

Formula:

Each 100 mL contains:

N-acetylcysteine 20 g

Excipients q.s.ad. 100 mL

Indications:

Mucolytic. Fluidizes secretions and facilitates the expulsion of mucous secretion, helping in the evolution and resolution of bronchopneumonia. As a coadjuvant treatment in respiratory processes with excessive or thick mucosal hyper secretion such as acute or chronic bronchitis, pneumonias, chronic obstructive pulmonary disease, etc., also as a fluidizer of mucous or mucopurulent secretions in cases of sinusitis, rhinopharyngitis, laryngotracheitis, etc.

Route of administration and dosage:

Oral. 5 ml / 100 kg of weight (equivalent to 10 mg of n-acetylcysteine / kg of weight), every 12 hours or according to the criteria of the acting professional. The duration of the treatment will be according to the evolution.

Limitations of use:

Do not administer to animals with a history of gastrointestinal ulcer. Do not administer together with antitussives or inhibitors of bronchial secretion (anticholinergic, antihistaminic).
